A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 26, 2007 has been entered.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim 2-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mencke et al (U.S. Patent No. 5,712,295) in combination with Mencke et al (WO 96/38165).

Mencke et al (U.S. Patent No. disclose compositions comprising agonists and antagonists of the nicotinerbic acetyl-choline receptors for combating endoparasites

Mencke et al (WO 96/38165) discloses compositions comprising avermectins or milbemycins, including moxideixin, for combating endoparasites. "It is prima facie obvious to combine two compositions each of which is taught by the prior art to be useful for the same purpose, in order to form a third composition to be used for the very same purpose... [T]he idea of combining them flows from their having been individually taught in the prior art". In re Kerhoven 626 F.2d 846, 850, 205 USPQ 1069, 1072 (CCPA).

Applicant's arguments filed June 26, 2007 have been considered but are moot in view of the new ground(s) of rejection.
